Android, NoSql

Certifications

SPJIMR

I was taught various business module like Marketing Management, Finance, Operations, Economics. and IT for business.

Languages Spoken

English, Hindi, Marwadi

Projects

PharmaQuick

Ongoing

- PharmaQuick is an application which will provide delivery services of medicines with the intention to minimize the delay between the ordering and the delivery of the medicines.
- The application will find the pharmacy nearest to the ordering location.
- My contribution in the application is to build a web application for the pharmacies to operate.

Suraksha

January 2020

- Suraksha is an application developed to get help during emergency situations.
- My role in the project was to find the live location of the victim and find and alert the nearby hospitals and the victim's emergency contacts.
- The application made use of Google Places API to fetch the location of the user.

FitHub

October 2018

- FitHub is an Android application that keeps the record of users health.
- The major functionalities of the application are to count the steps taken by the user, give diet recommendations as per BMI, and a forum for patients to chat with the doctors.

StockManager

December 2018

- StockManager is a mobile application that manages the stock of a retail store.
- The user will be able to add the stock whenever it is purchased and update the database on selling the commodity.
- The backend of the application was implemented in MySQL and the front end in Android.

Volunteering

Completed 30 + hours with Abhudaya as mentor for Class 10.

Being a mentor has given me an opportunity to help the students with the knowledge that I possess.
